Attn: Mr V Anandan

Dear Mr Anandan,

Thank you for introducing MSP products to FACI ASIA PACIFIC PTE LTD. We have found your product to be very superior in terms of enhanced performance and energy savings.

Our maintenance department has been using MSP penetrating lubricant for sliding rack and pinion arms. It has been found to be very effective as the equipment is exposed in a powdery environment. We find these gliding smoothly and effectively upon application of MSP penetrating lubricant.

Apart from pen lubricant, we are also using the MSP EP-2 lithium base grease for the motor bearings. The grease has reduced the noise level from the bearings and the vibration from the motors, after a week of MSP grease application.

We are so far in no doubt that by using MSP products, its superior performance has benefited us.

Our maintenance manager has reported the following

- 1) Longer Effective Operation on Machine
- 2) No Issues Arising From Friction Parts
- 3) More Productivity And Savings As Less Overtime Is Needed For Maintenance

We will highly recommend other users to MSP products.

Yours sincerely

Mr Vincenzo Tognetto
